## WELCOME FROM THE PRESIDENT

Under the auspices of

Dear Colleague,

it's my great pleasure to invite you to participate in the proceedings of **8<sup>th</sup> International Conference on Thoracic Oncology (CIOT)** that, in its annual recurrence, will take place in Virtual Format for the first time, from June 25<sup>th</sup> to June 26<sup>th</sup> 2020 organized by AIOT (Italian Association of Thoracic Oncology) and that I've the responsibility to chair.

I would like to call your attention to at least three interesting aspects of the Conference that make the appointment very peculiar and that I identify in its International form, in the virtual format and in its goals.

### International form

The 70% of Faculty is composed of foreign speakers, everybody playing an active part in clinical research in Thoracic Oncology and KOL in their respective countries. We expect significant foreign attendees. The official language of the Conference will be English.

### Virtual Format

For the first time, due to the emergency of COVID-19, the 8th International Conference on Thoracic Oncology will take place in virtual format to provide clinicians all over the world with access to the contributions.

### Goals

Setted immediately after ASCO, the Conference will give an update on the data coming from Clinical Research in Thoracic Oncology directly from the voice of its Authors more representative in an appointment that we would like to be lasting inside of the international congressional track.

For these reasons I'm trusting that you should appreciate the effort of the organizing secretariat to realize this scientific meeting doing credit to us with your attendance in our website.

Arrivederci

President of 8<sup>th</sup> CIOT

**Filippo de Marinis**
